

# Assignment 1: HTML Portfolio Page Activity

Create a simple HTML portfolio page that includes all the HTML elements you learned: tables, strong, iframes, audio, video, forms, header, footer, main etc.

## Steps:

### 1. Header & Footer:

- Create a header section in which your Name should be there
- Add a footer with contact information and social media links.

### 2. Main Section:

- Use a table to display a list of projects or skills, with one column for the project name/skill and another for a brief description.
- Add an video using iframe from YouTube that that is relevant to your portfolio.
- Add a map for the college where you studied

### 3. Media Integration:

- Embed an audio file that plays background music

### 4. Forms:

- Create a simple contact form where users can enter their name, email, and a message. Include a submit button.

### 5. Comments:

- Add comments to explain different sections of their code.

You can use the concepts of css whatever we learned till now. To add bit of designs.

Be creative !
