Assignment 8

This is the UI that was given in Assignment 2 that you should have created using Html, Css. Now in this assignment you have to create the Same UI using React.

Following components must be there:

1. Card : To show the details of product
2. Add To Cart: Create a separate component that should give Add to Cart button and this component will be used inside every Card Component.
3. Create another component to show details of Your Cart.
